I am a front-end web developer who enjoys being challenged and growing outside of my comfort zone. always eager to expand on my CS knowledge and technical skills to develop software applications.

## SKILLS

Languages: Javascript, Typescript, HTML, CSS/SCSS/SASS  
Technologies: React, Redux, GraphQL, Storybook, Node, MongoDB, Firebase, Azure, Git  
Designs: Responsive web design, Figma

## EDUCATION

Shanghai International Studies University Chinese and English Languages B.A. 2018  
Front-end education Bootcamp We code May - Aug 2022

## PROFESSIONAL EXPERIENCE

### Rye&Catchers

Seoul, South Korea

Front End Developer

Apr 2022 - Jul 2022

Rye&Catchers is a Systems Integration company.

react, typescript, hooks, styled-components, redux-toolkit

- worked as part of a team of psychology consultation service applications
- Helped reduce server traffic using amazon S3, implemented images & files CRUD
- Developed design system using storybook and applied Atomic Design theory (storybook, typescript, react, using OOP with emotion styled-component)
- Write clean TypeScript in React JS and Collaborated with team using GitLab

### Inhandplus Inc

Seoul, South Korea

Front End Developer

Nov 2020 - Jan 2022

InhandPlus is a healthcare solution startup, to solve the medication non-adherence problem, developing a medication-use smartwatch and AI-based medication management solution. I mostly developed a medication adherence management admin web applications for Merck China, Seoul University etc.

Seoul University medication admin website project 2021.08 - 2021.12

Stacks: React, recoil, styled-component, typescript, Highcharts, bit.dev, storybook, web pack, babel, REST

Collaboration tools: Azure, using Airbnb ESLint&Prettier policy, Postman

- Gained experience in working with a designer & PM intimately
- Implemented date picker & date slide picker without library
- Developed UI components using Storybook for building a design system and modularization using bit.dev
- Implemented different UI depending on user's requirements, added toast popup, debugging and download excel of participant's data
- Applied HTTPS with Nginx when deploying web application

Merck China Project 2020.11 - 2021.02 (Internship: Nov 2020 - Feb 2021)

- Redesigned date picker (with date picker Airbnb)
- Granted an opportunity to implement a project A - Z

## PROJECTS

**We todo** shared todo web application

JavaScript, React, Node.js, Express.js, MySQL, Sequelize, Socket.io, JWT, Bcrypt, Nodemon

- Front: Created login & todo list UI with MVC patterns
- Back: Real-time todo list using socket.io, Implemented register&login Authorization using jwt and bcrypt, Implemented validation with express-validator
